WEB DEVELOPER

Motivated Web Developer pursuing a Bachelor of Science in Information Technology (BSIT) at Holy Angel University. Skilled in SCSS, Node.js, JavaScript, and HTML, seeking a challenging position to leverage my web development expertise. Offering hands-on experience in building responsive, user-friendly websites and collaborating on full-stack projects. Strong foundation in front-end development and backend integration, with a focus on creating efficient, dynamic, and scalable web applications.

KEY COMPETENCIES

| | | |
|--------------------------------|--------------------------------|-----------------------------------|
| Back-End work | Report writing | Strong interpersonal skills |
| Data-driven strategic planning | Critical thinking skills | Proactive and self-motivated |
| Front-End work | Excellent communication skills | Exceptional organisational skills |

PERSONAL AND SCHOOL PROJECTS

Developed a Beauty Products Website - ShopOhBeauty **Dec 2022 - Jan 2023**
Front-end

I Built a responsive e-commerce website for beauty products using HTML, SASS, and JavaScript, without a database. The website includes product listings, a search bar, an 'Add to Cart' feature, and a dynamic shopping cart. Ensured seamless performance and user-friendly design across desktop and mobile views.

Developed a Cat Café Website - CAFE WHISKERS **Dec 2023 - Mar 2024**
Front-end, Back-end

Collaborated on a group project to build a fully functional cat café website using PHP, HTML, CSS, JavaScript, and a database (MySQL). The website features customer reservations, product listings, and interactive elements to enhance user experience. Ensured efficient database integration for managing bookings and inventory, while maintaining a responsive design for both desktop and mobile platforms.

Developed a Beauty and Accessories Website - StarLush **Sept 2024 - PRESENT**
UI Designer, Front-end, Back-end

Collaborated on a group project to build a beauty and accessories website using HTML, SCSS, JavaScript, Node.js, and MongoDB. The site features product listings, shopping cart functionality, and a fully integrated database for managing user data and orders.
