- HTML, CSS, JavaScript
- Angular
- Node
- C#, .NET API
- Tailwind
- Flutter
- PostgreSQL, Firebase

TOOLS

- VS Code
- Cursor
- Git

LANGUAGES

- English
- Tagalog

PROFILE

Motivated Web Developer currently pursuing Bachelor of Science in Information Technology (BSIT) at Holy Angel University. Proficient in HTML, CSS, Node.js, and JavaScript, with hands-on experience building responsive, user-friendly websites and contributing to full-stack projects. I am actively enhancing my skills in Angular, SCSS, and TypeScript to further strengthen my front-end development capabilities. Additionally, I am expanding my knowledge by learning how to use AI models via Cursor to speed up my workflow. I am focused on creating efficient, dynamic, and scalable web applications. Seeking a challenging position to leverage my technical skills, explore AI opportunities, and continue growing in a collaborative environment.

CERTIFICATIONS

- Certified Junior Angular Developer | June 15, 2025
- Legacy JavaScript Algorithms and Data Structures | March 4, 2024
- Responsive Web Design | January 18, 2024

PROJECT EXPERIENCE

Note Mobile Application - Novito

Feb 2025 - April 2025

UI Designer, Front-end

Novito is a note-taking app that can do more than just a note. This app lets you to store your notes and keep them organize by using folders, you can also create to-do lists, set your alarms on the clock page, create reminders, and you can see your schedule through the calendar page. I built this using Flutter, SQLite to store the data locally, and I practiced my prompting skills using Cursor as an IDE and Claude AI model.

Cat Café Website - Cafe Whiskers

Front-end, UI Designer

Dec 2023 - Mar 2024

Collaborated on a group project to build a fully functional cat café website using PHP, HTML, CSS, JavaScript, and a database (MySQL). The website features customer reservations, product listings, and interactive elements to enhance user experience. Ensured efficient database integration for managing bookings and inventory, while maintaining a responsive design for both desktop and mobile platforms.

ShopOhBeauty

DEC 2022 - JAN 2023

Front-end development

I built a responsive e-commerce website for beauty products using HTML, SASS, and JavaScript. The website includes product listings, a search bar, and Add to Cart feature, and a dynamic shopping cart. Ensured seamless performance and user-friendly design across desktop and mobile views.

EDUCATION

Bachelor's in Information Technology

2022 - PRESENT

School of Computing | Holy Angel University

GPA: N/A

Senior High School

2020 - 2022

Holy Angel University

GPA: 91.09
