- UI/UX
- Front-end
- Back-end
- Mobile Development
- Effective Communication
- Critical Thinking

LANGUAGES

- English (Fluent)
- Tagalog (Fluent)
- Japanese (Beginner)

PROFILE

Motivated Web Developer currently pursuing Bachelor of Science in Information Technology (BSIT) at Holy Angel University. Proficient in CSS, Node.js, JavaScript, and HTML, with hands-on experience building responsive, user-friendly websites and contributing to full-stack projects. I am actively enhancing my skills in Angular, SCSS, and TypeScript to further strengthen my front-end and back-end development capabilities. Additionally, I am expanding my knowledge by learning how to train AI models, combining my web development expertise with an interest in AI and machine learning. With a strong foundation in both front-end development and back-end integration, I am focused on creating efficient, dynamic, and scalable web applications. Seeking a challenging position to leverage my technical skills, explore AI opportunities, and continue growing in a collaborative environment.

PROJECT EXPERIENCE

ShopOhBeauty

DEC 2022 - JAN 2023

Front-end development

I Built a responsive e-commerce website for beauty products using HTML, SASS, and JavaScript. The website includes product listings, a search bar, and Add to Cart feature, and a dynamic shopping cart. Ensured seamless performance and user-friendly design across desktop and mobile views.

Cat Café Website - CAFE WHISKERS

Dec 2023 - Mar 2024

Front-end/Back-end Development

Collaborated on a group project to build a fully functional cat café website using PHP, HTML, CSS, JavaScript, and a database (MySQL). The website features customer reservations, product listings, and interactive elements to enhance user experience. Ensured efficient database integration for managing bookings and inventory, while maintaining a responsive design for both desktop and mobile platforms.

Beauty/Accessories Website - StarLush

Sept 2024 - Nov 2024

UI Designer, Front-end/Back-end

Collaborated on a group project to build a beauty and accessories website using HTML, SCSS, JavaScript, Node.js, and Firebase. The site features product listings, shopping cart functionality, and a fully integrated database for managing user data and orders.
